

# PLASMA TIMES

June, 2018 18th Edition

## Keshe Manufacturing Arizona

### Have you seen the Keshe Files?

#### By Jon Bliven

This week the foundation released the third installment of the Keshe Files and it contained an interview I did with Cary Ellis who handles communications for the foundation. In previous episodes she interviewed Caroline Keshe on the peace process and Dr Gatua wa Mbugwa PhD on agriculture with plasma. If you have not listened to these excellent interviews you may wish to in order to get a better idea of the depth of the teachings that are being shared.

These interviews help to share not only the knowledge of those around the foundation but allow for people to get to better understand the work of those supporting the foundation. There are many that fall into the category of support and some are more active than others but all roles are important. There has been a theme that unites all of us to the greater collective and that is our desire to serve and not be served. United as one planet, one nation, and one race.

The Keshe Foundation has been outstanding in bringing plasma technologies forward worldwide for a better now and a better future. Many have been learning how to use these plasma applications and are putting them into practice in many areas of life. These interviews provide insights into the many applications and wide expanse of use for plasma technology to do everything from increasing food production and facilitating world peace to implementing space travel. Enjoy and share.

Here are the three links to the interviews;

1. The peace process with Caroline Keshe

## **Farewell**

**By Miguel Bueno**

Over the last two years I've had the pleasure of working at the Arizona facility as a Research and Development Engineer. My tasks at the facility have been broad and have taught me many parts of the manufacturing process. I've also learned to code better and improved my ability to design custom parts.

One of my first tasks in Arizona was to get a semi-automated coil winder operating at the specifications desired for the Magrav coils. It was very rewarding to make changes to the Gcode and get perfectly wound coils at the exact dimension needed. It also allowed us to produce many more coils than was previously possible without the machine. We now produce all the coils for many of the products (Magrav coils, capacitors, Pain Pens) on that coil winder.

More recently I've been focusing on using computer aided design software (SolidWorks) to create custom part for the facility. In conjunction with designing the parts, I've set up a 3D printer at the facility so that parts can be created in house. This has allowed us to conduct experiments faster than would otherwise be possible if the parts had to be machined for us.

It has been a please working with the team at Keshe Manufacturing Arizona and with many others around the foundation.

## **Updates from Arizona**

**By Jon Bliven**

The month seemed like a slow news month but in fact much was continuing to unfold. Numerous groups are working to unlock the technology of the spacecraft. The technology has been demonstrated by governments but it needs to be made visible to those that wish to serve using the new technology. This has been the focus in our facility in Arizona. Each day through both successes and failures we learn more and more each day. It feels like we are getting very close to a better understanding, that which will allow things to move forward.

For this month I will leave my updates as these and hopefully next month exciting news can be shared. Let's all wish for success from the foundation and those who work around it.

## KESHE FOUNDATION LATEST UPDATES!

### 1. New Store Products – add plasma to your life!

**Plasma Liquid Hand Soap** has an antiseptic action, reducing bacteria and other microorganisms. This innovative PLASMA formulation moisturizes and protects delicate sensitive skin.

[https://store.keshefoundation.org/store/product/plasma\\_liquid\\_soap/](https://store.keshefoundation.org/store/product/plasma_liquid_soap/)

**One Soul Plasma T-Shirt** integrates plasma technology with ancient knowledge, using an exclusive process infusing GANS into the painted chakra symbols, for balance of the chakras, while the back bands infused with GANS create a calibrated plasma field. This interacts with magrav fields of sun and earth, encouraging flow of what the Tibetans called kundalini. The One Soul T-Shirt supports mind, soul and body for peaceful mediation and access to higher states of consciousness.

### 2. Plasma Scientific Journal - Help Build the Future of Plasma

The Keshe Foundation invites Your submissions of experiments and demonstrations of Plasma science to the Plasma Scientific Journal. Find instructions at KesheFoundation.org including how to submit your work and the format by which to organize your submissions.

<https://support.keshefoundation.org/section.php?section=science-journal&go=go>

### 3. Invitation to Join Transcribers and Translation Groups

With the all the Knowledge Seekers Workshops, and thousands involved in nearly every country in the world –our transcribers and translators are very busy. If you have an interest and perhaps a bit of talent, please apply to join us in this much needed work! Fill out the Expertise Contribution Form and we will get back to you as quickly as possible!

## 5. A Glance at KFSSI Education Private Teaching Subjects

- ✓ Health Teaching - Private
- ✓ Soul Teaching - Private
- ✓ Tips on Becoming a Teacher - Private
- ✓ Private in Polish
- ✓ One Planet One Race One Nation for World Peace – Public
- ✓ Private in German
- ✓ Private Agriculture – Professional level
- ✓ Caroline Keshe Knowledge Seekers Workshop
- ✓ Medical Professional level – Private
- ✓ Keshe Plasma Reactor Group – Public
- ✓ Review of 226<sup>th</sup> Knowledge Seekers Workshop
- ✓ Study of MT Keshe's Book – Private
- ✓ Music for the Keshe Foundation

The Keshe Foundation invites you to join our Private Teachings which take place in several languages. Much knowledge and research is growing weekly to take advantage of for just \$100 Euros per year – which helps maintain the many hours of teachings accessible in our archives. Medical and Agricultural require specific application and qualifications. Go to <https://keshefoundation.org/education> to apply to the area(s) of your choice!

See you on the inside with other knowledge seekers from around the world!
